

Tutorial: Changing Screen Saver

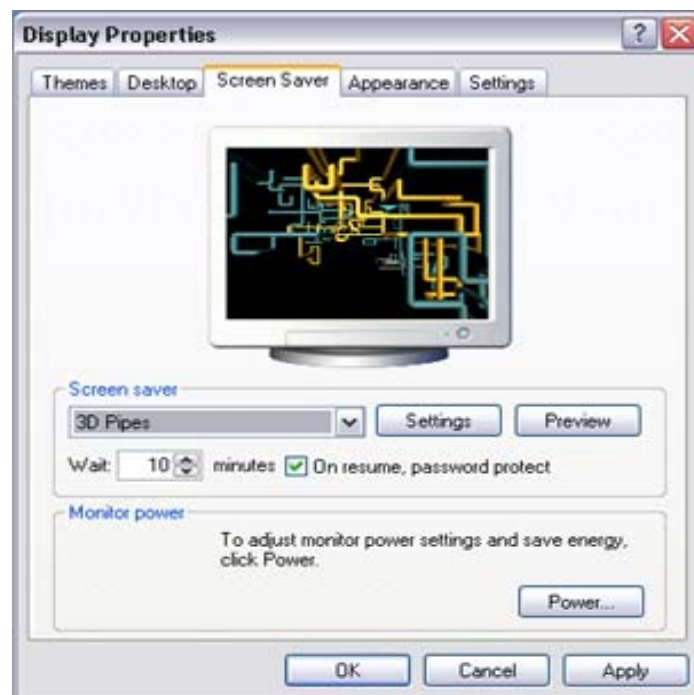

1 - Find an area of your desktop without any icons, and right click the mouse to bring up this menu:

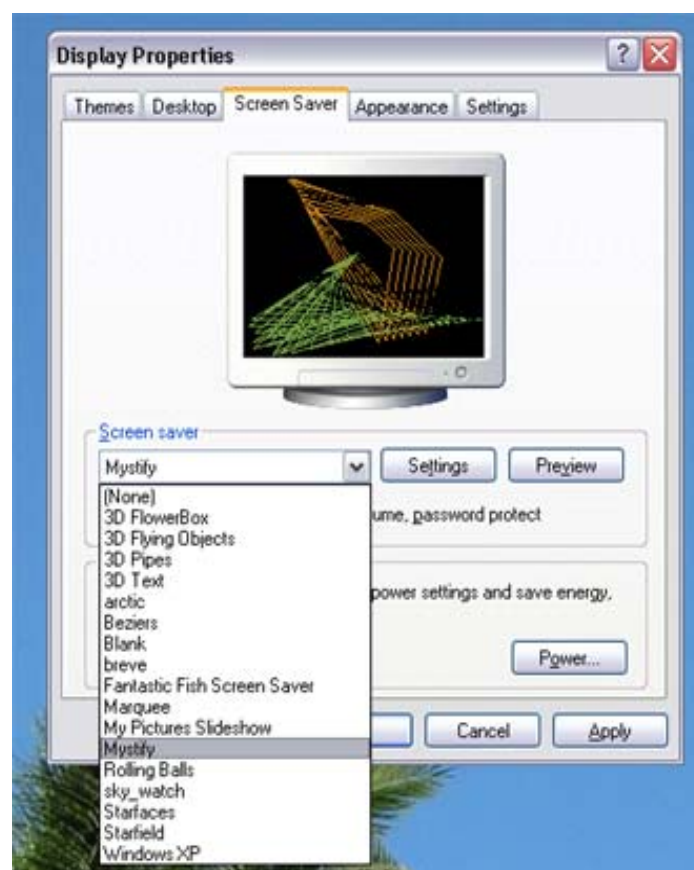

2 – Click on 'Properties' to bring up the 'Display Properties' window shown below:

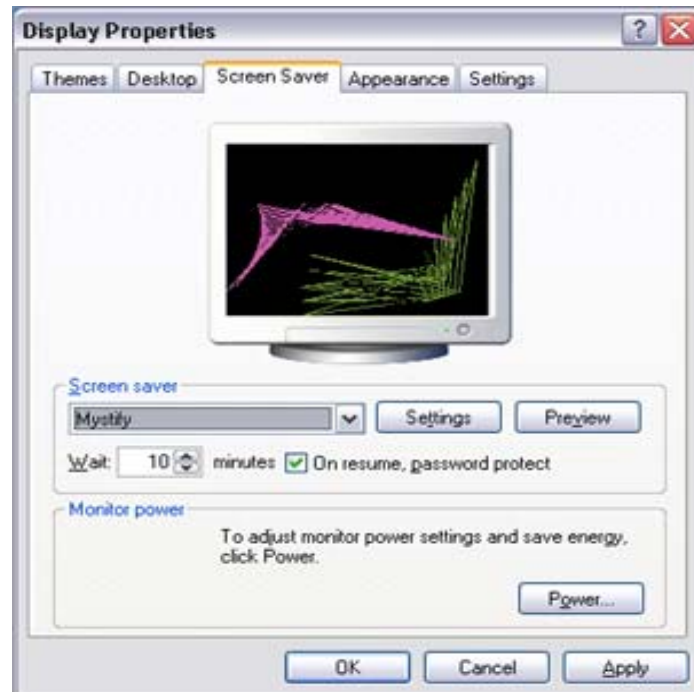

3 – Click on the 'Screen Saver' Tab at the top to access the following window:

4 – Use the 'Screen Saver' drop down menu to preview available screen savers:

5 – Once you have selected the screen saver you want, you can specify the amount of time your PC will be inactive before the screen saver is displayed.

6 – If you want to change more settings the click on the 'Settings' button, however these are specific for each screen saver. Otherwise click 'OK', and your screen saver will be set.
